Pedal unit function

The optional pedal unit is equipped with 3 foot pedals that produce a variety of intense effects similar to those of acoustic piano pedals.

🚺 Sustain (right) pedal

The damper pedal functions in the same way as the damper pedal on an acoustic piano. When the damper pedal is depressed, the note will be extended. Releasing the pedal immediately stops the Stops the sustain.

The "half-pedal" effect helps you create a half sustain effect with the damper pedal, depending on how far you depress the pedal.

If you depress the damper pedal here, the note played before releasing the pedal note will be extended for a longer period of time.

2 sustain (middle) pedal

If you play a note or chord on the keyboard and press the sustain pedal, as long as the pedal is pressed (just like a damper pedal) those notes will be extended, but the notes played after them will not be extended. This extends the chord note, while the other notes are "broken".

If you press and hold this note and depress the sustain pedal, you can sustain the note until the pedal is released. until the pedal is released.

B Soft Tone (Left) Pedal

Depressing the soft pedal reduces the volume and slightly changes the tone of the note being played at that moment. Depressing the soft pedal will not affect the notes already played.
